DETAILED ACTION

Summary

On December 22, 2004, an Office Action was mailed to the Applicant rejecting claims 1-15, 17-19, 22-24, and 28. On June 22, 2005, the Applicant responded by amending claims 1 and 28.

Claim Objections

The objections have been withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-15, 17-19, 22-24, and 28 are rejected under 35 U.S.C. 102(e) as being anticipated by Sehr (US 2001/0018660), as set forth in the previous Office Action.

Sehr discloses an electronic ticketing system utilizing multi-service visitor cards comprising adding the second user's payment information to the payment instructions, routing the payment information and the payment instructions to an issuer utilizing the network address instructions (p.7-8, 63 and p.15, 105—information is added in order for funds to be transferred to the account).

Art Unit: 3624

Response to Arguments

In response to the arguments, the Examiner has cited the section citing "adding the second user's payment information to the payment instructions, routing the payment information and the payment instructions to an issuer utilizing the network address instructions", as requested by the Applicant.
